WHO WE ARE

Orchid Orthopedic Solutions is a worldwide leader in contract design and manufacturing solutions for the orthopedic, dental, and cardiovascular markets. Orchid's key mission is to be the leader in contract medical design and manufacturing by compressing time to market, providing new technology, and being the best total supply-chain value. The company meets the ISO 13485:2003 international standard for medical devices and related services that consistently meet customer requirements and regulatory requirements. Orchid's purpose is to provide an opportunity for people to live a better life. Through acquisitions of leading orthopedic design firms and manufacturers, the company now consists of ten contract manufacturers that offer an array of implants and instruments within five core capabilities design, forging, machining, plastics, and coatings. Contract manufacturers include: Orchid Design; Orchid Stealth; Orchid Anzon; Orchid Keller; Orchid MPS; Orchid Unique; Orchid MACDEE; Orchid Bio-Coat; Orchid Bio-Vac; and Orchid Stealth Coating.

MAJOR MARKETS

Orchid Orthopedic Solutions specializes in implants, instruments, and innovative technologies for the following markets: reconstruction, trauma, spine, sports medicine, orthobiologics, extremities, dental, and medical devices.

SERVICES OFFERED

Orchid Orthopedic Solutions' contract design and manufacturing divisions offer the following products and services: Orchid Design: contract design (e.g., implant and instrument systems, design troubleshooting; customs and specials; and gage design and fabrication); Orchid Stealth: near-net forging (e.g., joint and bone replacement components, plates, and extremity parts); Orchid Anzon, Orchid Keller, Orchid MPS, and Orchid Unique: advanced machining (e.g., implants, surgical instruments, screws, nails, plates, and joint replacement parts); Orchid MACDEE: medical-grade precision-machined and molded plastic products (e.g., medical devices, implants, components, and delivery systems); and Orchid Bio-Coat, Orchid Bio-Vac, and Orchid Stealth Coating: HA, TPS, and RBM, porous, and bead coatings and surface treatments (e.g., implants). New technologies, products, and design innovations are constantly being developed for Orchid customers.
